

Letter of Recommendation

To Whom It May Concern,

I am delighted to recommend Tam Mai, who interned with our team during the summer of 2025. As her manager, I had the pleasure of working closely with Tam and witnessing her exceptional analytical capabilities and proactive approach to problem-solving.

Tam quickly distinguished herself through her work on several high-impact Power BI dashboard projects. Notably, she played a key role in developing and refining our Executive Resource Forecasting and Financial Reconciliation views, which were instrumental in improving our visibility into staffing needs and financial system reconciliation. Her dashboards not only streamlined reporting but also enabled more accurate forecasting and decision-making across departments. During our Resource Forecasting Dashboard Review, Tam presented her updates with clarity and confidence, earning praise for both her technical execution and her strategic thinking.

Tam's ability to analyze complex datasets, identify trends, and visualize data in meaningful ways was consistently impressive. She demonstrated a deep understanding of both the tools and the business context, which allowed her to deliver solutions that were both technically sound and operationally relevant.

Beyond her technical skills, Tam is a thoughtful communicator and a collaborative team member. She actively sought feedback, adapted quickly to new challenges, and maintained a high level of professionalism throughout her internship.

I am confident that Tam will bring the same level of excellence, integrity, and analytical rigor to any future role. She has my highest recommendation.

Sincerely,
Brianne Melrose
