Education

University of South Florida — Expected May 2027
*Bachelor of Science in **AI & Business Analytics*** — *GPA: 3.84*

Technical Skills

Product & Growth: Roadmapping, PRDs, User Interviews, Competitive Analysis, Stakeholder Management, Agile/Scrum, Jira, Figma.
Languages: SQL (HackerRank Advanced Certified), Python (Pandas, NumPy, Polars), R.
AI, BI & Analytics: Claude, Figma MCP, Microsoft Copilot Studio, Atlassian Rovo, Power BI, Tableau, DAX, dbt.
Data Platforms & Tools: Databricks, Snowflake, Apache Spark, HDFS, AWS (S3, Lambda, Athena), Docker, Confluence, GitHub, VBA.

Experience

Micron Technology · Memory & storage · NASDAQ: MU — May 2026 – August 2026
Technical Product Manager Intern — *Boise, ID*

- Scoped an AI meeting-minutes agent for **18 program managers** across 5 memory technologies from a project charter and **10 user interviews**, cutting Confluence and Zoom-API to ship the **MVP** on Outlook and manual upload.
- Killed v1 (M365 Copilot Lite RAG) after mid-point demo showed slow retrieval and unresolved acronyms, rebuilding on **Copilot Studio** with 9 context files to raise accuracy **∼48% → ∼85%** and cut drafting time **∼1.5 hrs → ∼30 min**.
- Scrapped a single Rovo agent with **4 sequential modes** after brittleness in testing, rebuilding on **4 lightweight agents + 2 automations** to ship a monthly cross-PMO newsletter across **24 semiconductor programs** with PM and director review gates.
- Shipped a **single-API-call** controller macro with a dry-run coverage report for human audit, saving **2 hrs/month** on module scheduling.

USF Judy Genshaft Honors College — June 2024 – Present
Product Analyst — *Tampa, FL*

- Ran faculty discovery on Research Portal engagement and shipped adoption dashboards showing what to fix next; iteration moved weekly actives **1,200 → 5,300** (**∼4x**) and unlocked **$10K** in grant-funded expansion.
- Own the roadmap for **12 self-serve dashboards** across 3 portals for advisors, faculty, and leadership, prioritizing views from **stakeholder interviews** rather than whoever asks loudest.
- Found an at-risk student outreach gap in advisor interviews and pitched a **probation-tracking dashboard**, now used by **9 advisors** for weekly caseload review in the Honors Student portal.
- Wrote **SQL validation** (CTEs, window functions) catching **5 discrepancies pre-production** in cohort metrics, giving Honors a single source of truth and cutting advisor onboarding **∼2 weeks**.

VSP Vision · Largest U.S. vision insurer — June 2025 – August 2025
Business Intelligence Analyst Intern — *Remote*

- Cut a 9-tab forecasting dashboard to **2 views** after interviewing team leads on which KPIs each tier actually used, serving **7 directors and 25 managers** in the tech org.
- Surfaced **$2M** in budget-to-actual variances (±15%) across **17K+ financial records** pulled from **ServiceNow** into Excel, flagging cost deviations for manager review.
- Automated expense reconciliation across **40 cost centers and 3 ERP systems** using Power Query M and DAX, cutting **∼20 hours/month** of manual work.

Elevance Health · Fortune 500 health insurer — June 2024 – August 2024
Business Information Analyst Intern — *Mason, OH*

- Restored data accuracy for **15 claims ops stakeholders** by resolving **10 reporting tickets** across **1.8M claim records** via SQL stored procedures with joins and CTEs.
- Cut ticket resolution time **30%** by pushing for cross-functional syncs to replace async back-and-forth between ops and engineering.
- Tuned **DAX measures** and date filtering on a claims monitoring dashboard processing **100K+ daily records**, cutting load time while preserving 30/60/90-day rolling windows.

Projects

Quiescent · Chrome extension helping readers track and revisit what they read — September 2026 – Present
Technical Product Manager — *Team of 5*

- Co-led discovery across **10 user interviews**, surfacing **habit-tracker fatigue in 3 of 6 first-wave users** and invalidating the team's streak-based hypothesis, re-anchoring MVP on reflection and retention.
- Benchmarked **5 tools** (Readwise, Duolingo, NotebookLM, Matter, Goodreads) and **cut MVP scope from 18 features to 6**, dropping features competitors already shipped to protect a **4-week build** for 3 engineers.
- Authored the **MVP PRD for 6 features** with prioritized user stories and edge cases, giving engineers one scoped spec to build against.
- Designed **3 core screens** in **Figma** with reusable components via Claude and the **Figma MCP server**; now building the working prototype (web reader + Chrome extension) from those frames in **Claude**.

Leadership

Google Developer Group on Campus — January 2025 – April 2026
Community Team Chair, DevFest & HackUSF Director — *University of South Florida*

- Drove **62% attendance growth** at DevFest 2025 for **230 participants**, leading a team of 8 across **4 cross-functional teams** (Marketing, Finance, Prof Dev, Executive).
- Directed **HackUSF 2026** for 350 participants, training 50 volunteers and running sponsor outreach that secured **$8,000+** in prizes at **8x YoY conversion** (0.75% → 6%).
