EDUCATION

University of South Florida

Bachelor of Science in **Business Analytics**

- **Awards:** Dean's List (2023, 2024, 2025, 2026), Presidential Scholarship.
- **Courseworks:** Statistical Analysis with R, Applied Data Science, Big Data for Business Applications.

Expected May 2027

GPA: 3.92

TECHNICAL SKILLS

Languages: SQL (HackerRank Advanced Certified), Python (NumPy, Pandas, Matplotlib, Seaborn, Polars), R.

BI & Visualization: Power BI, Tableau, AWS QuickSight, Excel.

Data Platforms & Tools: Databricks, Snowflake, Apache Spark, HDFS, AWS (S3, Lambda, Athena), dbt, Docker, Git.

EXPERIENCE

Micron Technology

Technical Program Manager Intern

May 2026 - Present

Boise, ID

- Owned end-to-end delivery of centralized AI agent (Microsoft Copilot Studio), standardizing product development meeting minutes for 20–30 PMOs across all 5 technologies, cutting active working time from 1.5 hours to 30 minutes per session.
- Architecting **4-agent hierarchical AI system (Atlassian Rovo)** for cross-PMO intelligence across **12+ semiconductor programs** — PDT Summarizer, Cross-Program Synthesizer, adversarial QA Checker, and dual-mode chatbot.
- Drove adoption through **10 stakeholder interviews**, workflow presentations to PMO leadership, and **playbooks** capturing what works vs. what doesn't; secured buy-in and shaped governance across 5 technologies.

USF Judy Genshaft Honors College

Business Intelligence Developer

June 2024 – Present

Tampa, FL

- Engineering multi-step **data transformation workflow in Python (Polars)** integrating **5 data sources** across **100K+ students** spanning 10 cohort years, implementing FTIC classification logic and data quality validation to generate longitudinal datasets.
- Automating cohort generation pipeline calculating **15 institutional metrics** across student segments from ETL outputs, enabling on-demand 10-year trend analysis for accreditation reporting and strategy.
- Developed **15 Power BI dashboards** analyzing 60K+ Honors student records using **star schema** models and **DAX**, partnering with 4 cross-functional teams and empowering 8 advisors to monitor caseloads and act on at-risk students **independently**.
- Validated data integrity by developing **15 SQL scripts (CTEs, window functions, joins)** to cross-check DAX calculations, resolving **5 discrepancies** before production deployment.
- Created 15 in-dashboard user guides and 15 technical documentation files on GitHub, reducing onboarding time by **2 weeks** and enabling **30% increase** in self-service adoption across IT and advisory teams.

VSP Vision

Business Intelligence Analyst Intern

June 2025 – August 2025

Remote

- Automated expense reconciliation workflow consolidating 40 cost centers across **3 ERP systems** using **Power Query M Code** and **DAX**, eliminating **20 hours/month** manual work.
- Analyzed 17K+ financial records in Excel to detect **\$2M** in budget-to-actual variances ($\pm 15\%$), flagging cost deviations for leadership review and corrective action.
- Redesigned 9-tab resource forecasting dashboard into **2 streamlined solutions** serving 7 executives and 25 managers, reducing navigation complexity and surfacing the targeted KPIs each stakeholder tier needed for faster decisions.

Elevance Health

Business Information Analyst Intern

June 2024 – August 2024

Mason, OH

- Resolved **10 reporting tickets** processing **1.8M claim records** through **SQL stored procedures** with complex joins and CTEs, restoring data accuracy for 15 claims operations stakeholders.
- Initiated cross-functional meetings to replace asynchronous ticket communications, reducing resolution time by **30%**.
- Enhanced claims monitoring dashboard processing **100K+ daily records** by optimizing **DAX measures** and date filtering logic, improving load time while maintaining 30/60/90-day rolling windows for executive risk assessment.

PROJECTS

FinPulse Fraud Detection Pipeline | Python, Apache Spark, HDFS, Docker

April 2026

- Built **4-job Spark batch transformation pipeline** joining 5 fraud datasets into a 1.15M-row enriched fact table with 26 engineered features and 99,997 customer behavioral profiles.
- Analyzed fraud patterns across merchants, channels, and geography; surfaced **98.5% false positive rate** in existing rule engine, quantifying **\$9.4M/year** in recoverable analyst costs through z-score behavioral modeling.

LEADERSHIP

Google Developer Group on Campus

Community Chair - DevFest and HackUSF Director

January 2025 – April 2026

University of South Florida

- Organized DevFest 2025 for **230 participants** across 4 cross-functional teams, managing project timeline via GitHub Kanban and achieving **62% attendance growth**.
- Directed HackUSF 2026 logistics for **350 participants** across 6 workshops and 10 rooms, training **50 volunteers** and improving operational efficiency by **45%**.
- Owned HackUSF 2026 sponsor outreach — templates, training, and meetings — securing **\$8,000+** in prizes and improving conversion rate **8x** (0.75% $\rightarrow$ 6%).
